

Write an HTML program to display the details of different continents from world map using Image map.

```
<!DOCTYPE html>
<html>
<h3>Mapping an Image</h3>
<body>
<p>Click on the different continents of the map to know about them.</p>

<map name="worldmap">
<area shape="rect" coords="150,164,211,197" alt="north america"
href="https://en.wikipedia.org/wiki/North_America">
<area shape="rect" coords="221, 304,263,330" alt="south america"
